

CHINA

BIOPHARMACEUTICAL BUSINESS DELEGATION

21 – 30 May 2026 · Suzhou · Nanjing · Hainan · Nantong

An Executive Immersion into China's Premier Life Science & Biopharmaceutical Ecosystem

This delegation offers European business leaders an unparalleled opportunity to engage directly with China's most dynamic biopharmaceutical hubs. Over ten days, participants will attend high-level cooperation conferences, conduct curated site visits, and hold structured matchmaking sessions with leading pharmaceutical companies, cutting-edge biotechnology firms, world-class research institutes, and government investment authorities across four strategically selected cities.

PROGRAMME AT A GLANCE

21 May (Thu)	Arrival & Opening · Shanghai / Suzhou
12:00 – 14:00	Welcome Lunch & Delegate Orientation
14:00 – 18:00	Suzhou Global Biopharmaceutical Cooperation Conference
19:00 – 20:30	Official Welcome Dinner
22 May (Fri)	Site Visits & Exchanges · Suzhou Biobay & Medpark
9:00 – 12:00	Suzhou Biobay – Pharmaceutical & Biotech Facility Tours
14:00 – 18:00	Suzhou Medpark – Medical Device & Digital Health Tours
19:00 – 20:30	Dinner & Networking
23 May (Sat)	Transfer · Suzhou → Nanjing by High-Speed Rail (~1.5 hrs) and take a rest
24 May (Sun)	Site Visits & Exchanges · Nanjing

10:00 – 17:00 Pharmaceutical & Biotech Facility Tours across Nanjing

25 May (Mon) Conference & Site Visits · Nanjing

10:00 – 12:00 Sino-European Sciences Innovation Cooperation Conference (Nanjing)

12:00 – 14:00 Lunch & Networking

14:00 – 18:00 Site Visits & Exchanges – Nanjing Life Science Cluster

26 May (Tue) Site Visits & Networking · Nanjing

08:30 – 10:00 Site Visits & Exchanges – Biomedical Engineering Centres

12:50 – 15:50 Networking & Bilateral Meetings

27 May (Wed) Conference & Matchmaking · Hainan Free Trade Port

10:00 – 12:00 Hainan Sino-European Life & Health Industry Cooperation Conference

12:00 – 13:30 Lunch & Networking

14:00 – 17:30 Thematic Matchmaking Sessions (see below)

Evening Official Welcome Dinner – Hainan

Session I · Innovative Biopharmaceuticals & Specialty Drugs

Session II · Frontier Technologies in Cell & Gene Therapy

Session III · High-End Medical Devices & Digital Therapeutics

28 May (Thu) Site Visits & Transfer · Hainan → Nantong

09:00 – 11:30 Site Visits – Hainan Medical Technology & Cell CDMO Platforms

Afternoon Lunch & Transfer to Nantong

29 May (Fri) Conference & Site Visits · Nantong

10:00 – 12:00 Nantong Sino-European Biopharmaceutical Innovation Cooperation Conference

12:00 – 13:30 Lunch & Networking

14:00 – 17:30 Site Visits & Exchanges – Nantong Life Science Cluster

30 May (Sat) Conclusion · Departure for Europe

PARTNER ORGANISATIONS & INSTITUTIONS

The following organisations have confirmed participation across four city clusters. Each has been selected for its strategic significance within China's life sciences ecosystem — spanning innovation authorities, leading pharmaceutical companies, frontier biotechnology firms, world-class research institutions, and major financial institutions.

◆ SUZHOU | Jiangsu Province – China's Premier Biopharma Innovation Hub

Government & Investment Authorities

► Administrative Committee of Suzhou Industrial Park (SIP)

The governing authority of one of China's most advanced innovation zones, established as a flagship China–Singapore cooperation project. SIP hosts a rapidly expanding ecosystem of pharmaceutical, biotech, and international R&D companies, with dedicated innovation platforms, incubation programmes, and talent initiatives.

► Investment Promotion Bureau of Suzhou Industrial Park

Responsible for attracting international investment and supporting foreign enterprises in SIP. Works closely with MNCs, start-ups, and research organisations to facilitate joint ventures, technology partnerships, and the establishment of R&D centres and regional headquarters.

► Administrative Committee of Suzhou High-Tech Zone

Oversees one of China's most important high-technology industrial districts, with a strong base in advanced manufacturing, medical devices, biotechnology, and digital healthcare. Provides industrial infrastructure, innovation platforms, and policy incentives for research commercialisation.

► Investment Promotion Bureau of Suzhou High-Tech Zone

Attracts international investment and supports high-technology enterprises in the zone, offering tailored investment services for companies in medical technology, biotechnology, and digital health. Facilitates the establishment of research centres and innovation platforms.

Leading Pharmaceutical & Biotech Companies

► Ascentage Pharma

Innovative biopharmaceutical company specialising in targeted small-molecule drugs for oncology, hepatitis B, and age-related diseases. Maintains a strong clinical-stage pipeline with apoptosis-targeted therapies and integrated capabilities from drug discovery through commercialisation.

► JW Therapeutics

Pioneer in China's cell therapy sector, developing and commercialising CAR-T cell therapies for haematological malignancies. Holds a comprehensive platform spanning research, clinical development, manufacturing, and commercialisation of next-generation cancer immunotherapies.

► GeneQuantum Healthcare

Biotechnology company specialising in antibody-drug conjugates (ADC), an emerging class of precision oncology therapies. Builds an integrated ADC innovation platform from drug discovery and conjugation technologies to clinical development.

► CStone Pharmaceuticals

Innovative biopharmaceutical company focused on targeted therapies and immuno-oncology drugs. Has built a strong pipeline of novel drug candidates with integrated capabilities covering drug discovery, regulatory affairs, and commercialisation.

► Innovent Biologics

中国国际投资促进中心(德国)
China International Investment Promotion Agency (Germany)

中法
城市
发展协会
可持续
发展
Association Franco-Chinoise du
Développement Urbain Durable

One of China's leading biopharmaceutical companies developing monoclonal antibodies and biologic therapies for oncology and autoimmune diseases. Combines advanced drug development technologies with large-scale manufacturing and global pharmaceutical partnerships.

► **Ribo Life Science**

Biotechnology company specialising in RNA-based therapeutics and nucleic acid drug development, addressing oncology, metabolic disorders, and infectious diseases. At the forefront of China's RNA medicine innovation.

► **Transcenta Therapeutics**

Fully integrated biotechnology company with platforms covering antibody-based drug discovery, clinical development, and biologics manufacturing for cancer and bone diseases.

► **Alphamab Oncology**

Innovative biotech focused on next-generation antibody therapeutics for oncology, with a clinical-stage pipeline of novel biologic drug candidates.

► **TenNor Therapeutics**

Biotechnology company pioneering novel anti-infective therapies, including next-generation antibiotics combating antimicrobial resistance — one of global medicine's most urgent challenges.

► **EpimAb Biotherapeutics**

Specialises in next-generation bispecific antibodies using proprietary engineering technologies. Focused on oncology and immunotherapy with sophisticated multi-target antibody structures.

► **Abogen Biosciences**

Leading mRNA biotechnology company developing mRNA-based vaccines and therapeutics for infectious diseases and cancer. Holds an integrated platform spanning mRNA design, lipid nanoparticle delivery systems, and clinical development.

► **PharmaBlock Suzhou R&D Center**

Global provider of integrated pharmaceutical research, development, and manufacturing services, specialising in medicinal chemistry, process research, and pharmaceutical intermediates.

► **Puhe Biopharma**

Biopharmaceutical company engaged in the development of innovative therapeutic products with strong R&D and manufacturing capabilities.

Global Medical Technology Companies (Suzhou Sites)

► **Becton Dickinson (BD) Suzhou**

Part of the global medical technology leader operating in 190+ countries. Suzhou site supports manufacturing and innovation in infection control, diagnostic testing, and patient care technologies.

► **Fresenius Medical Care Suzhou**

Part of the world's largest provider of dialysis products and services. Suzhou facility contributes to international manufacturing of life-sustaining renal therapy technologies.

► **GE HealthCare Suzhou**

Part of GE HealthCare's global network, internationally recognised for leadership in medical imaging, patient monitoring, and digital healthcare. Suzhou operations support both technology development and production for Asia-Pacific.

► **Sansure Biotech Suzhou**

Developer of molecular diagnostic technologies based on nucleic acid detection, providing diagnostic reagents and automated testing platforms for clinical laboratories and public health institutions worldwide.

► **Ortho Clinical Diagnostics Suzhou**

Part of the global diagnostics company specialising in in-vitro diagnostic technologies. Suzhou site is a key hub for the company's China and Asia-Pacific operations in blood screening, immunohaematology, and laboratory diagnostics.

► **Mindray Suzhou R&D Center**

中国国际投资促进中心(德国)
China International Investment Promotion Agency (Germany)

中法城市可持续发展协会
Association Franco-Chinoise du
Développement Urbain Durable

R&D facility of one of China's most globally recognised medical device leaders, developing patient monitoring, diagnostic imaging, and in-vitro diagnostic systems used in hospitals worldwide.

Research Institutions & Industry Platforms

► CAS Suzhou Institute of Biomedical Engineering and Technology (SIBET)

Research institute under the Chinese Academy of Sciences, conducting interdisciplinary research in medical imaging, diagnostic technologies, biomedical materials, and advanced medical devices. Actively translates scientific discoveries into clinical healthcare technologies.

► Soochow University Medical College

Leading Chinese medical education and research institution with extensive international cooperation, conducting research in molecular medicine, oncology, neuroscience, and regenerative medicine.

► Suzhou BioPharma Association

Industry body strengthening communication and collaboration among companies, academia, and government in Suzhou's rapidly growing life science sector. Connects local enterprises with global partners.

► Suzhou Medical Device Innovation Center

Technology platform providing laboratory infrastructure, product verification services, and regulatory consulting to help companies commercialise innovative medical devices.

► Suzhou Biomedical Engineering Innovation Center

Innovation hub connecting industry, academia, and healthcare institutions to accelerate the development and commercialisation of biomedical technologies in the Suzhou region.

Financial Institutions

► Bank of China – Suzhou Industrial Park Branch

Provides financial services supporting high-technology enterprises and innovation projects within SIP, with specialised programmes for life science and biomedical sector development.

► Bank of Jiangsu – Suzhou Branch

Regional financial institution offering corporate lending, investment services, and innovation financing for biotechnology, pharmaceutical, and medical device companies.

◆ NANJING | Jiangsu Province – National Biomedical Innovation Capital

Government & Investment Authorities

► Nanjing Investment Promotion Bureau

Municipal authority responsible for attracting domestic and international investment to Nanjing, actively promoting biopharmaceutical innovation clusters including Nanjing Biomedical Valley and Jiangbei New Area.

► Nanjing Municipal Bureau of Commerce

Primary government body for economic cooperation with international partners, supporting cross-border partnerships and high-technology industry development in life sciences, medical technology, and digital health.

► Nanjing Jiangbei New Area Biopharmaceutical Valley

One of China's fastest-growing life science innovation hubs, hosted within a national development zone. Supports the full pharmaceutical value chain from drug discovery and clinical development to manufacturing and commercialisation.

► Nanjing Biomedical Valley

Major industrial cluster dedicated to biopharmaceutical development, hosting pharmaceutical companies, biotech start-ups, research institutions, and CROs. Provides specialised laboratories, incubation programmes, and investor access.

► Nanjing Biomedical Valley Innovation Center

Technology incubation and research collaboration platform within the Nanjing Biomedical Valley, accelerating the commercialisation of discoveries in biologics, gene therapy, and medical devices.

Leading Pharmaceutical & Biotech Companies

► Legend Biotech

International biotechnology leader in CAR-T cell therapy for cancer. Founded in Nanjing, now a global organisation with R&D and clinical operations across Asia, Europe, and North America. Its multiple myeloma CAR-T therapy, co-developed with Johnson & Johnson, is approved in major global markets.

► BeiGene – Nanjing Site

Part of BeiGene, one of the world's most internationally active Chinese biotechnology companies, with a global network of R&D, clinical development, and manufacturing for innovative oncology therapies.

► Sincere Pharmaceutical Group

One of China's leading pharmaceutical companies, pioneering drug development in oncology, central nervous system disorders, and autoimmune diseases. Operates across research, manufacturing, and commercialisation with a diverse innovative pipeline.

► GenScript Biotech

Global biotechnology company headquartered in Nanjing, providing gene synthesis, biological research services, and cell therapy technologies to pharmaceutical companies, biotech firms, and academic institutions worldwide.

► Hengrui Medicine

One of China's foremost pharmaceutical companies, with a strong innovative drug development focus in oncology, anaesthesia, autoimmune diseases, and metabolic disorders. Increasingly active in global pharmaceutical markets.

► Innovent Biologics (Nanjing)

Biologics leader with fully integrated drug discovery, clinical development, and large-scale manufacturing capabilities, developing monoclonal antibodies and biologic therapies for major therapeutic areas.

► Yangtze River Pharmaceutical Group

One of China's largest pharmaceutical enterprises, integrating research, manufacturing, and distribution across a broad therapeutic portfolio including cardiovascular, anti-infective, and traditional medicines.

► Chia Tai Tianqing Pharmaceutical

中国国际投资促进中心(德国)
China International Investment Promotion Agency (Germany)

中法城市可持续发展协会
Association Franco-Chinoise du
Développement Urbain Durable

Major Chinese pharmaceutical company with a comprehensive R&D centre focused on oncology, liver diseases, and respiratory disorders, developing both small-molecule drugs and biologic therapies.

► **Bioheng Therapeutics**

Biotechnology company advancing CAR-T cell therapies and engineered immune cell treatments for difficult-to-treat cancers, with research platforms covering cell engineering and translational research.

► **Yuyue Medical**

One of China's leading medical device manufacturers with a broad portfolio of healthcare products for hospitals, clinics, and home healthcare, including respiratory equipment, diagnostics, and digital health technologies.

► **QYuns Therapeutics**

Innovative biotech with proprietary antibody discovery platforms for autoimmune and inflammatory diseases, holding a clinical-stage pipeline of next-generation monoclonal antibody candidates.

► **BioSciKin**

Biotechnology company building integrated antibody discovery and clinical research capabilities for autoimmune, inflammatory, and oncology indications.

► **Leads Biolabs**

Immuno-oncology and immunotherapy-focused biotech developing next-generation antibody-based cancer treatments using advanced antibody engineering technologies.

► **Vazyme Biotech**

Biotechnology company specialising in enzymes, molecular diagnostic reagents, and life science research tools widely used in clinical diagnostics and biotechnology worldwide.

► **Anji Bio-Pharmaceutical**

Biotechnology company developing innovative medicines and biopharmaceutical technologies targeting complex diseases through modern drug discovery and translational research.

► **Triastek**

Pharmaceutical technology company pioneering the application of 3D printing to drug development, enabling precisely engineered oral dosage forms with controlled drug release and improved patient compliance.

► **Pharmaron – Nanjing**

Part of Pharmaron, a global CRO providing integrated pharmaceutical research services including medicinal chemistry, biology, pharmacology, and toxicology to accelerate drug candidate development.

► **BioDuro – Nantong / Nanjing**

Contract research organisation providing integrated services for drug discovery and early-stage pharmaceutical development for global pharmaceutical and biotech companies.

► **ChemPartner Nanjing**

Global CRO offering medicinal chemistry, biology research, pharmacology, and drug candidate optimisation services for international pharmaceutical companies.

► **Medicilon Nanjing**

Leading Chinese CRO providing preclinical research services including drug safety evaluation, pharmacology, and toxicology to support pharmaceutical and biotech drug development programmes.

► **Porton Pharma – Nanjing**

Part of Porton Pharma Solutions, a global CDMO providing integrated services covering API development, process optimisation, and commercial pharmaceutical manufacturing.

► **Sanhome Pharmaceutical**

Pharmaceutical company engaged in developing and commercialising innovative medicines across multiple therapeutic areas.

► Nanjing University Medical School**RESTRICTED**

One of China's foremost academic institutions in biomedical education and research, with international cooperation programmes covering molecular medicine, neuroscience, immunology, and precision medicine.

► Southeast University – School of Biological Science and Medical Engineering

Major interdisciplinary research institution combining life sciences, biomedical engineering, and medical technology development, with close collaboration with hospitals and industry partners.

► CAS Nanjing Institute of Bioengineering

Part of the Chinese Academy of Sciences, conducting advanced biotechnology research in enzyme engineering, metabolic engineering, and synthetic biology, with wide applications in pharmaceutical production and industrial biotechnology.

► Nanjing Institute of Pharmaceutical Technology

Research organisation dedicated to pharmaceutical science, drug formulation, pharmaceutical engineering, and process development, supporting the translation of discoveries into industrial pharmaceutical production.

► Jiangsu Pharmaceutical Industry Association

Provincial industry body representing pharmaceutical companies, providing policy consultation, professional training, and facilitating innovation and internationalisation.

► Nanjing Biopharmaceutical Industry Association

City-level industry organisation promoting biopharmaceutical innovation, regulatory understanding, and international collaboration among member companies.

► Jiangsu Industrial Technology Research Institute – Life Science Division

Bridges scientific research and industrial innovation, supporting biotechnology, pharmaceutical, and medical device projects through research infrastructure, funding, and technology transfer services.

Financial Institutions**► Bank of China – Nanjing Branch**

Major regional branch of one of China's largest state-owned commercial banks, supporting trade, investment, and industrial development with comprehensive corporate lending, trade finance, and cross-border settlement services.

► Bank of Jiangsu – Nanjing Branch

Regional commercial bank specialising in corporate financing and innovation funding for biotechnology, advanced manufacturing, and high-technology companies across the Jiangsu economy.

◆ HAINAN | Hainan Free Trade Port – China's Open Gateway to Global Healthcare

Government & Investment Authorities

▶ Hainan International Economic Development Bureau (IEDB)

Provincial agency responsible for promoting international investment in the Hainan Free Trade Port — one of China's most open economic zones. Provides full-spectrum services for global investors in biopharmaceuticals, healthcare, and technology.

▶ Haikou National High-Tech Zone Pharmaceutical Valley

Major biopharmaceutical industrial cluster supporting pharmaceutical manufacturing, biotech research, and medical technology development within the Haikou High-Tech Zone. Offers specialised infrastructure and preferential policies.

▶ Hainan Pharmaceutical Industry Association

Provincial industry organisation representing pharmaceutical manufacturers and biotech companies, facilitating policy dialogue, professional development, and international exchange.

▶ Haikou Health Industry Promotion Association

Organisation connecting healthcare enterprises, medical institutions, and government agencies to advance biopharmaceuticals, medical devices, and health technology in the Haikou region.

Pharmaceutical & Biotech Companies

▶ Hainan Simcere Pharmaceutical

Part of Simcere Pharmaceutical Group, focused on manufacturing and commercialising innovative medicines while leveraging the preferential policies of the Hainan Free Trade Port.

▶ Qilu Pharmaceutical – Hainan

Part of Qilu Pharmaceutical Group, one of China's leading pharmaceutical manufacturers. Hainan facility focuses on oncology, antibiotic, and cardiovascular drug production for domestic and international markets.

▶ Hainan Haiyao Co.

Established pharmaceutical company headquartered in Haikou, covering development, manufacturing, and commercialisation across multiple therapeutic areas with an expanding innovation and modernisation agenda.

▶ Hainan Poly Pharm

Internationally oriented pharmaceutical company with export-registered injectable medicines and high-quality generic drugs. Manufacturing facilities comply with international quality standards and support global pharmaceutical supply chains.

▶ Bloomage Biotech – Hainan Industrial Park

Part of Bloomage Biotech, globally recognised for bioactive materials including hyaluronic acid. Hainan park integrates research laboratories and large-scale biotechnology manufacturing for pharmaceuticals, medical devices, and health products.

▶ Hainan Susun Biotech

Biotechnology company applying modern biological technologies to pharmaceutical development, medical materials, and healthcare innovation.

▶ Hainan Weili Medical Technology

Medical technology company engaged in healthcare device development and biomedical technology innovation within Hainan's expanding life science sector.

▶ Xin Kailian Biotech – Hainan

Biotechnology company developing biological products and biomedical solutions, contributing to Hainan's efforts to build a stronger life science industry.

中国国际投资促进中心(德国)
China International Investment Promotion Agency (Germany)

中法城市可持续发展协会
Association Franco-Chinoise du Développement Urbain Durable

► **Hainan Hongzheng Biotech**

RESTRICTED

Biotechnology enterprise focused on research, development, and industrialisation of innovative biomedical technologies and biological health products.

► **Bioway Gene Technology – Hainan**

Biotechnology company applying genomic technologies to disease detection, personalised medicine, and biomedical research, contributing to the development of modern diagnostic solutions.

► **Hainan Digi Biotech**

Biotechnology company engaged in biomedical technology development and healthcare product innovation within Hainan's emerging biotechnology sector.

► **Hainan Better Pharmaceutical**

Pharmaceutical company focused on the development and manufacturing of quality pharmaceutical products serving clinical treatment needs.

Research Institutions & Medical Platforms

► **Hainan University – School of Pharmacy**

Academic institution dedicated to pharmaceutical education and research covering natural product chemistry, pharmaceutical biotechnology, and drug formulation, collaborating with hospitals and industry partners.

► **Hainan Medical University – Drug Safety Evaluation Center**

Specialised preclinical research and testing institution conducting pharmacology studies, toxicology evaluation, and laboratory testing required for early-stage drug development.

► **Engineering Research Center for Tropical Drug Innovation – Hainan Medical University**

Research centre focusing on tropical drug development and transformation, contributing to pharmaceutical innovation in Hainan's distinctive tropical environment.

► **Hainan Institute for Inspection and Testing**

Scientific testing and quality assurance institution providing analytical testing, product evaluation, and regulatory compliance assessment for pharmaceuticals and medical devices.

► **Optics Valley Haikou Biocity Cell CDMO Platform**

Specialised CDMO service platform for cell therapies and advanced biologic medicines. Provides contract development and manufacturing from early research through clinical manufacturing, building a complete ecosystem for next-generation biopharmaceutical production in Hainan.

► **Haiping Medical Device Industrial Park**

Industrial cluster dedicated to medical device development and production, bringing together manufacturers, research institutions, and healthcare companies.

Financial Institutions

► **Bank of China – Hainan Branch**

Provides comprehensive financial services for Hainan's growing innovation economy, supporting biopharmaceutical, healthcare, and technology enterprises with corporate banking and international financial services.

► **Industrial and Commercial Bank of China (ICBC) – Hainan Branch**

Part of the world's largest commercial bank, providing corporate banking, investment financing, and international settlement services supporting major investment and innovation projects in the Hainan Free Trade Port.

◆ NANTONG | Jiangsu Province – Emerging Biopharmaceutical Manufacturing Hub

Government & Industry Authorities

► Nantong Biopharmaceutical Industry Association

Industry coordination body bringing together pharmaceutical manufacturers, biotech companies, and research institutions in the Nantong region, promoting policy dialogue and international engagement.

► Nantong Innovation Zone Life Science Promotion Center

Government-industry bridge supporting biotechnology and pharmaceutical development within the Nantong Innovation Zone, facilitating technology transfer and investment attraction.

► Qidong Biopharmaceutical Industry Development Office

Coordinating body for biopharmaceutical sector development in Qidong, supporting industrial planning, investment promotion, and major pharmaceutical project coordination.

► Jiangsu Biopharmaceutical Industry Association

Province-wide industry organisation representing pharmaceutical and biotech companies, providing policy advocacy, knowledge exchange, and international cooperation support.

► Jiangsu Medical Device Industry Association

Industry organisation representing medical device manufacturers and technology companies across Jiangsu Province, supporting innovation, regulatory compliance, and international exchange.

Pharmaceutical & Biotech Companies

► WuXi AppTec – Qidong

Part of WuXi AppTec, one of the world's leading CRO/CDMOs providing open-access technology platforms enabling global pharmaceutical and biotech partners to accelerate drug discovery and production.

► Hengrui Medicine

See Nanjing profile. Hengrui's national presence includes key Nantong-area operations supporting one of China's most innovative pharmaceutical pipelines.

► Innovent Biologics

See Nanjing profile. Maintains a significant operational presence in Jiangsu including Nantong-area activities supporting large-scale biologics manufacturing.

► Yangtze River Pharmaceutical Group

See Nanjing profile. Major pharmaceutical enterprise with broad Jiangsu Province operations covering manufacturing and distribution.

► GenScript Biotech

See Nanjing profile. Global biotech leader with presence in Nantong supporting life science research services.

► Merck Pharmaceutical – Jiangsu

Part of Merck, the global German science and technology company, with a Jiangsu facility representing an important component of Merck's pharmaceutical manufacturing and supply network in China.

► Asymchem – Nantong

Part of Asymchem Laboratories, a globally recognised CDMO specialising in pharmaceutical process research, custom synthesis, and API manufacturing for leading pharmaceutical companies worldwide.

► Pumai Biopharmaceutical – Nantong

Biotechnology company developing and manufacturing biologic medicines using advanced biotechnology platforms for therapeutic protein discovery and production.

中国国际投资促进中心(德国)
China International Investment Promotion Agency (Germany)

中法
城市
发展协会
Association Franco-Chinoise du

► **BioDuro – Nantong**

RESTRICTED

Contract research organisation providing integrated research services for drug discovery and early-stage pharmaceutical development for global clients.

► **Sword Pharma – Nantong**

Pharmaceutical manufacturing company producing high-quality active pharmaceutical ingredients and pharmaceutical intermediates for domestic and international drug manufacturers.

► **Nantong Lianya Pharmaceutical**

Pharmaceutical manufacturer producing a range of formulations and chemical medicines across multiple therapeutic areas, with modern production and quality control infrastructure.

► **Jiangsu Sennics Biopharma**

Pharmaceutical ingredient and specialty chemical manufacturer supporting drug development through high-quality chemical compounds and pharmaceutical intermediates.

► **Jiangsu Wango Pharmaceutical**

Pharmaceutical manufacturing company engaged in the development and production of chemical medicines and pharmaceutical formulations for clinical use.

► **InnoScience Biotech – Nantong**

Biotechnology company integrating laboratory research and industrial production of biomedical products, contributing to Nantong's growing life science sector.

► **Sansure Biotech – Nantong**

Developer of molecular diagnostic technologies and nucleic acid detection platforms, widely used in clinical laboratories and public health institutions globally.

► **Nanjing Micro-Tech Medical**

Medical device company specialising in minimally invasive diagnostic and therapeutic technologies including endoscopic instruments, with global hospital distribution.

Financial Institutions

► **Bank of China – Nantong Branch**

Provides financial services supporting innovation and industrial development in Nantong, with specialised programmes for life science and high-technology companies.

► **Bank of Jiangsu – Nantong Branch**

Regional commercial bank offering corporate loans, project financing, and banking solutions designed to support innovation-driven enterprises in Nantong and the broader Jiangsu region.

YOUR SEAT AT CHINA'S BIOPHARMACEUTICAL TABLE

This delegation has been designed to deliver executive-level access to China's most consequential life science ecosystems. The organisations you will meet are not selected at random — they represent the institutions actively shaping the future of global biopharmaceuticals. We look forward to welcoming you.
